

REPRIEVE SAVES MIND OF MURDERER IN JAIL

Jerry Rossa, Who Was to Have Been Hanged To-Morrow With Mrs. Tolla, Breaks Down Under Suspense.

Mrs. Antoinette Tolla and Jerry Rossa, the woman and man who were to have been hanged in Hackensack to-morrow for murder, were told shortly after midnight that the Board of Pardons of New Jersey had granted both of them a reprieve for thirty days.

Justice Mercer had not expected to commiserate the news to the condemned murderers and murderers until to-day, but about midnight word was brought to him that Rossa was on the verge of collapse and was in such a nervous state that his mind was likely to give way.

The man would crouch in the corner of his cell and cry out in fear. Then he would become abusive and cry out to his keepers that he was innocent, that his life was being sworn away by men who were enemies of his and friends of Demetrius d'Arina, the man he was convicted of slaying. Such was the man's condition that the sheriff decided not to delay taking the news of the reprieve to him. He had not received an official communication from the Board of Pardons, but after he conferred with Prosecutor Koester he determined to act at once.

Rossa Collapsed.

Rossa, trembling and wild-eyed, was called to the door of his cell. The door was flung wide and the man was told that he would live for thirty days longer, at least. He gave the cry of an animal as he fell upon his knees and clasped the sheriff's knees in his arms. Mrs. Tolla was the opposite of the man. Apparently resigned to her fate, she was lying on the narrow cot in her cell when the sheriff went to the bars of the door and called her.

"The Board of Pardons has granted you a reprieve for thirty days," he told her quietly.

The woman opened her eyes wide. She seemed not to understand the sheriff's words.

"I say a reprieve has been granted to you for thirty days," he repeated.

Mrs. Tolla walked from her cell and smiled. She took the sheriff's hand in both of hers and kissed it. Then she turned and walked back to her cell.

"I thank you," she said in Italian. "I did not think I was to die to-morrow."

It is now said that new evidence has been discovered in the case of Rossa, which may gain him a new trial and which may prove that he is a victim of false swears.

Countess Awaiting Her.

If the miserable little murderer had seen that austere judicial body in yesterday's convention—Governor Stokes, the Chancellor and the six Judges and the one person who was admitted to their hearing, a serene, sensible, black-gowned woman, without the least trace of feminine flurry or bustle about her, who presented her facts and explained the points of law with perfect understanding and precision—then perhaps Antoinette Tolla would have said to herself: "Here is a staff I can lean on."

For Mrs. Quackenbos, the New York attorney, spoke before the Board of Pardons less than thirty minutes. She submitted her affidavits and received that for which she had asked—thirty days' reprieve. And she came out to be greeted with a clamor of con-

HIS TONGUE GONE, ACTOR SPEAKS AGAIN

Frederick Power Surprises Surgeons After an Operation for Cancer.

CHICAGO, Jan. 11.—Frederick Power, actor and stage manager, who had his tongue cut out in an operation for cancer five weeks ago, is again able to talk so as to be understood.

The case is said by physicians to be a remarkable triumph for surgery. All of Mr. Power's tongue and part of the root had to be removed in the operation. But with the organ of speech gone he is able to articulate, uttering some words quite distinctly.

For several days Mr. Power has been attempting to sing, and the hospital attendants say that, while the efforts were not entirely successful, they have encouraged the patient and made him quite happy.

There is still some paralysis in Mr. Power's lower lip, due to the operation, and there is a heavy gold bridge in his mouth. His jaw is still held in a heavy plaster cast, and when these impediments are removed it is believed he will be able to articulate fairly well.

FIRE MENACES 100 MILLS AND FACTORIES.

Blaze on Newtown Creek Emphasizes Need of Better Protection There.

Property valued at more than \$1,000,000 was in jeopardy this morning when fire destroyed the big planing mill of John Solan, on Newtown Creek, at Metropolitan avenue and Grand street, Williamsburg. The actual damage will amount to about \$400,000.

There are about one hundred planing mills and factories along the creek, and for a time it looked as if all would be swept away. The fire was discovered about 4 o'clock by a watchman. He turned in an alarm, but the first engine, located on Graham avenue, more than a mile away, did not arrive until a half hour later. By this time the Solan mill was a furnace and the flames were spreading to the adjoining buildings.

The firemen did not attempt to save the Solan mill, but devoted their attention to the surrounding property.

For more than two years the mill and factory owners in this section of Williamsburg have been urging the city to give them better fire protection, and have even offered the city property on which to build an engine house.

Line of Least Resistance.

Everybody naturally takes the line of least resistance—that is, the reaction in which he meets the least opposition.

We all want to "take things easy," and the articles that make things easier for us are the ones that meet the demand. The newspaper contributes to the world's ease by making known the easy things in every line.

Take for example the latest "easy novelty," the "easy medicine," Cascares, Candy Cathartic, easy to buy, easy to eat, easy to give children, easy to carry and easy in their action. Medicine-giving and taking used to be a hardship, but the ease-loving world progresses.
